Contents xi

Section 1. Point defects in amorphous SiO_2 and GeO_2: electron spin resonance

The many varieties of E′ centers: a review
R.A. Weeks 1
A separate class of defects in silica: the natural EX center in thermal SiO_2 on Si
A. Stesmans 10
From E′ centers to the 'characteristic' resonance: a colleague's reminiscences on the scientific odyssey of Robert A. Weeks
D.L. Griscom 22
Paramagnetic resonance of E′-type centers in Si-implanted amorphous SiO_2. Si^{29} hyperfine structure and characteristics of Zeeman resonances
H. Hosono, H. Kawazoe, K. Oyoshi and S. Tanaka 39

Section 2. Point defects in silica glass: luminescence and optical absorption

The origin of the intrinsic 1.9 eV luminescence band in glassy SiO_2
L. Skuja 51
Reaction kinetics of oxygen-deficient centers with diffusing oxygen molecules in silica glass
H. Imagawa, T. Arai, H. Hosono, H. Imai and K. Arai 70
Oxygen-deficient centers in silica glasses: a review of their properties and structure
A.V. Amossov and A.O. Rybaltovsky 75

Section 3. Structure and vibronic excitations of silica and silicate glasses

The structure of vitreous silica: What have we learned from 60 years of diffraction studies?
A.C. Wright 84
The role of large facilities in understanding silicate glasses
A.J. Leadbetter 116
Structure of alkali-silicate and germania glasses at high temperature and pressure
S.K. Sharma, T.F. Cooney and S.Y. Wang 125

Section 4. Quartz

Anisotropic tunneling states in neutron irradiated quartz?
C. Laermans and V. Keppens 135

Section 5. Hydrogen, hydroxyl, hydride and water in amorphous SiO_2

Protonic species in vitreous silica
J.E. Shelby 138
Interaction of hydrogen with defects in a-SiO_2
A.H. Edwards, J.A. Pickard and R.E. Stahlbush 148
Water diffusion, oxygen vacancy annihilation and structural relaxation in silica glasses
M. Tomozawa, H. Li and K.M. Davis 162
X-ray induced absorption bands in synthetic fused silicas: OH content dependence of intensities of X-ray-induced absorption bands in type-III fused silicas
N. Kuzuu 170
Kinetics of enhanced photogeneration of E′ centers in oxygen-deficient silica
H. Nishikawa, E. Watanabe, D. Ito and Y. Ohki 179
Diffusion of water in vitreous silica
P.B. McGinnis and J.E. Shelby 185

Section 6. Fundamental mechanisms of radiation damage in SiO_2

Excitons in crystalline and amorphous SiO_2: formation, relaxation and conversion to Frenkel pairs
N. Itoh, T. Shimizu-Iwayama and T. Fujita 194
Intrinsic- and extrinsic-defect formation in silica glasses by radiation
H. Imai and H. Hirashima 202
Gaseous species and their photochemical reaction in SiO_2
K. Awazu and H. Kawazoe 214
Radiation color center formation in silica glasses: a review of photo- and thermo-chemical aspects of the problem
A.V. Amossov and A.O. Rybaltovsky 226
The formation mechanisms of oxygen deficient defects in synthetic silica glasses
S. Hayashi, K. Awazu and H. Kawazoe 235

Section 7. Photoeffects in pure and Ge-doped silicas

Effects of exposure to photons of various energies on transmission of germanosilicate optical fiber in the visible to near IR spectral range
E.V. Anoikin, V.M. Mashinsky, V.B. Neustruev and Y.S. Sidorin 243
Photosensitivity in germano-silicate sol–gel thin films
K.D. Simmons, G.I. Stegeman, B.G. Potter Jr. and J.H. Simmons 254
Vacuum ultraviolet-induced strain in vitreous silica used for xenon lamp bulbs
Y. Morimoto, T. Igarashi and T. Okanuma 260
Photostimulated evaporation of SiO_2 at room temperature by undulator irradiation and its dependence on sample fabrication
K. Awazu, H. Onuki, S. Iijima and K. Watanabe 276
Modeling of the non-linear optical properties of the [GeO_4] centers in silica
R. Pandey and M. Coolidge 281

Section 8. Silica and silicate glasses: ion implantation, corrosion, natural occurrence, precipitated iron particles, internal friction

Ion implantation in silicate glasses
G.W. Arnold 288

THE PAPER AND INK USED IN THE ORIGINAL PUBLICATION MAY AFFECT THE QUALITY OF THE MICROFORM EDITION.

Molecular mechanisms for corrosion of silica and silicate glasses
B.C. Bunker 300
Homogeneity of Libyan Desert glasses
G.H. Frischat, M. Am Wege, W. Beier and R.A. Weeks 309
Magnetic properties of small iron systems: from ferromagnetic resonance of precipitated particles in silica to Stern–Gerlach deflections in molecular beam
I.M.L. Billas, W.A. de Heer and A. Chatelain 316
Internal friction of SiO_2 glass with excessive oxygen
H. Kobayashi, T. Kosugi and Y. Kogure 324

Section 9. Manufacturing methods; optical fibers; thermal and plasma oxides; crystallization

Comparison of high-purity H_2/O_2 and LPG/O_2 flame-fused silica glasses from sol–gel silica powder
D. Torikai, C.K. Suzuki, H. Shimizu, T. Ishizuka, J. Yagi, K. Orii and T. Miyakawa 328
Enlarging of an optical fiber preform with viscose silica fiber
M. Eriksson 335
Radiation resistance of fluorine-doped silica-core fibers
K. Sanada, N. Shamoto and K. Inada 339
Thermal oxidation mechanism based on formation and diffusion of volatile SiO molecules
Y. Takakuwa, M. Nihei, T. Horie and N. Miyamoto 345
Low-temperature plasma-assisted oxidation of Si: a new approach for creation of device-quality $Si–SiO_2$ interfaces with deposited dielectrics for applications in Si MOSFET technologies
G. Lucovsky, T. Yasuda, Y. Ma, S. Hattangady, V. Misra, X.-L. Xu, B. Hornung and J.J. Wortman 354
Effects of ultraviolet irradiation and corona discharge on the crystallization from NiO/SiO_2 mixed gels
T. Isobe, S. Omura and M. Senna 367
